Kuwait MI1

his vessel pays practically no port dues. His dates can therefore be warehoused in the dhow, until the market can easily absorb them.

The dhow trade is "native" trade, a stubborn plant which has been growing a long, long time. Nearly all the cargoes carried in dhows are for the native bazaars, and almost never for European account. Much of the cargoes consists of goods which the dhow captain himself, or some merchant or merchants travelling with him, sells for his own profit. The dhow is a peddler, as well as a carrier; a storehouse, as well as a ship; a means of livelihood to travelling merchants, as well as to her crew proper. Basra dates, though the most important outward cargo,[1] are only one source of revenue: there are a host of others, not necessarily always legitimate.

Kuwaiti owners of date plantations on the nearby Basra river play a considerable part in the financing of deep-sea dhows, though in most cases the captains, called *nakhodas*, are at least the nominal owners. It suits the merchants well that the *nakhodas* should regard themselves as the owners, for this provides them with a cheap form of insurance. If the dhow be lost it is the *nakhoda's* loss, and not the merchant's, for the poor captain must pay back not only the value of the dhow but the advance of freight given him to finance his voyage. Since Islam forbids all forms of ordinary insurance, this arrangement is to the merchant's liking. The *nakhodas* must accept it, for in most cases there is no other way by which they can acquire a big dhow.

In Kuwait, immediately prior to the outbreak of World War II, there was beginning to be some restiveness about this, and an association of the *nakhodas* had the temerity to issue its demands upon the merchants. These included payment of demurrage when unduly delayed at the loading berths in Basra (a dhow might be kept for weeks waiting for her cargo), a sliding scale of freights for different ports instead of the customary flat rate of 1.5 or 2 rupees a package regardless of destination, liability for the return of advances to cease with the loss of the ship, two competent officers for every seagoing dhow, and so forth. The demands represente

[1] Crew requirements and the very measurements of the dhows themselves are reckoned in terms of dates. A sailor to each 100 packages is the general rule, in Kuwait, and a dhow is spoken of there as having a capacity for 2,000 packages of dates, rather than as being of 100 tons burden.
